ABOUT ATELIER RUBEN VAN MEGEN

Atelier Ruben van Megen focusses on quality, craftsmanship and telling a story through surprising materials and techniques.

Ruben van Megen (1984) designs and produces high end interiors, furniture en home deco based on stories that are worth telling. Van Megen brings a modern perspective to the history of design, by redesigning it and adding new context. To realize something unique, Van Megen believes you should use an integrated approach of designing, the design aesthetics, the clients preferences, the space in itself and finally adding an extra layer, namely the Ruben van Megen twist. The recycling of old stories, philosophies, memories and materials is a recurring theme in van Megen's work.

Ruben van Megen graduated in 2012 from the Design Academy in Eindhoven, with a specialization on 'public space'. Before that, he studied at the HMC College in Rotterdam. His passion for design and fascination for developing new materials are a guarantee for unique high profile work.

The interiors and products are manufactured in our own workshop. High-quality materials are chosen for this. Materials either come from our own collection or are obtained from specialized partners. By maintaining good relationships with our partners, we know the newest and most surprising materials.

Awards

In 2016, the dining table from the Café 6116 collection was rewarded with a Red Dot Award; one of the most prestigious European labels for high quality design. More awards followed. In 2021, the atelier was rewarded with the Baars & Bloemhoff interior design award.

Rubens work is often international presented. For example, during the Salone del Mobile in Milano, the London Design Festival, NYC x Design and the Dutch Design Week. His pieces are included in the collections of several international galleries and museums.

CUSTOM MADE UNICOLOUR KITCHEN

Atelier Ruben van Megen realized this kitchen in an old farmhouse. The carefully constructed simplicity ensures that the environment is a striking part of the total picture. It has also been decided not to make a typical kitchen, by placing three separate pieces of furniture. Thanks to the calm design and the use of color, the kitchen has become an oasis of tranquility in this family home.

SANDCASTLES

The Sandcastles collection is made from a special composition of sand and epoxy. The collection, consisting of furniture and home deco, has been used many times in interiors. This concerns the furniture itself, or the material for which a new application has been found to fit the specific needs or aesthetics.

PRIVATE HOMES

Atelier Ruben van Megen develops many diverse interiors for specific spaces in private homes, such as custom-made wardrobes, bathrooms, paneling in living rooms, etc.

Custom made furniture

The atelier designs custom made furniture like these tables, to fit the spaces atmosphere and aesthetics. Some designs are made in small editions.

Left: oak table with matching benches, based on the Café Solid-design

Right: Table from the collection Café 6116, made out of Persian carpet

Right: oak table with a personal inscription in the table top, based on the Café Solid-design
Left: table Café Solid, made out of solid surface material with a sandblasted tattoo on the table top.

CUSTOM MADE SOLID SURFACE KITCHEN

This kitchen is completely constructed from solid surface material; a sheet material made of mineral, plastic and stoneware. The design was inspired by the mineral pirite and the kitchen had to be produced as sustainably as possible. The design therefore left 0% residual material. All sheet materials have been fully applied.

The customer values are fully reflected in this kitchen; sustainability, simplicity, hygiene and tidyness to optimally enjoy cooking and eating together.

INTERIOR FOR A HEALTHCARE PRACTICE

An interior for healthcare must comply with specific (hygiene) regulations. These rules limit the choice of design and use of materials. Within the possibilities that were available, we have realized this stunning interior. This interior has proved innovative and exemplary for the type of healthcare in which this customer is active.

DESIGN AND ART

The furniture of Atelier Ruben van Megen are pieces of art in itself. In an interior we often combine these with works of art by artists that we feel good about. We can deliver turn-key interiors including art, or we can provide art advice and leave the final decision to the customer. Our large network ensures that we can give good advice that is practically feasible.
